Number of Sales (YTD)	24,710	N/A	N/A	41.4%	17,475

Excludes the Hamptons and North Fork markets.

Record price trends and near-record sales dominated the Long Island third quarter housing market conditions and chronically inventory levels as low mortgage rates and rising vaccine adoption continued to drive demand. Median sales price jumped 17% year over year to reach a record of \$585,000, the sixth straight quarter of records. Weaker market conditions that existed at the high end of the market before the pandemic was seen in the median sales price jump of 24.7% compared to the same period in 2019. Average sales price followed the same pattern, rising 17.4% over the year to a record of \$692,912 and increasing 28.1% from the same period two years ago. The number of sales surged by 29% annually to 9,228, the third-highest volume in nearly two decades

of tracking. Listing inventory fell year over year by 21.7% to 6,615 to the third-lowest level on record in eighteen years of tracking. For context, listing inventory is 74.7% below the 26,145 peak in the second quarter of 2008. As a result of rising sales and falling listing inventory, the pace of the market was the third fastest on record. Months of supply, the number of months to sell all listing inventory at the current sales rate, was 2.2 months, 37.1% faster than the same period last year and 53.2% faster than the same period two years ago before the pandemic. More than half of all sales closed above the last listing price. The market share of sales above the last asking price, a proxy for bidding wars, doubled from the prior-year quarter, soaring to a record high of 55.8%.

Condo

- Sales surged to the second-highest on record as price trend indicators set new records
- Price trend indicators collectively rose year over year for the fourth consecutive quarter
- Listing inventory fell year over year for the seventh time in eight quarters
